FTB

THE POWER OF 5

With the accelerating advancement of technology , 2015 will be a bigger year for business transformation. 'The power of 5' gathers five most talked about business event profiles in Asia:

CARDS & PAYMENTS Asia 2015 | FUTUREBANK Asia 2015 | THE CASH HANDLING SHOW Asia 2015 | RETAIL WORLD ASIA 2015 | E-COMMERCE SHOW Asia 2015

These shows are designed with innovative ideas, technological inspiration and indestructible strategies to help you navigate the complexities of the new era.

Plan your revenue-generating activities for the year ahead at the event with:

The Conference

Hear from our esteemed keynote speakers:
THE FUTURIST - Robert Scoble, Author of 'The Age of Context'
THE INNOVATOR - Anthony Thomson, Co-Founder Metro bank and now Atom Bank
THE DISRUPTOR - Mike Brown, Regional General Manager, Uber

Interact and network with industry leaders from banks, government, retailers, transport and telcos at the dynamic, no-holds-barred sessions. Choose from 4 dedicated track of roundtables – Payments & Banking, Cash Handling, Fraud & Identification, Retail & E-Commerce – and join the debate!

The On-floor seminars

Get tips and tricks to better strategise your business through our 4 themed theatres with 9 hours of learning and 72 sessions for you to join in.

This is an excellent opportunity to bring your entire team to learn about the hottest topics, applications and solutions that could be the game changer for your business.

The Exhibition

Learn and discover the latest smart technologies for you and your organization at the event. Find out what's first in Asia and what's launching worldwide in the near future!

The exhibition showcase hundreds of products, services and solutions, live demonstrations of the latest technologies and innovations.

This is the biggest event of its kind in Asia that will welcome 8000+ attendees from Banks & Financial Institutions, Government, Telco Operators, Manufacturers, Retailers and Shopping Centres, F&B, Airlines, Casinos, Advertisers and Transport Operators.

GET YOUR FREE EXPO PASS NOW! *before 14 April 2015

First in Asia

Worldwide launch

New Product

Product Demo available at the event

Automated Retail Pte Ltd

SpotShop is a fully automated kiosk that combines the latest in automated retailing with the powers of digital, interactive media and marketing. Our solution comes with point of sale system, social media connections, remote inventory monitoring, price management, temperature control, customer service capability, data collection, sales analytics and support infrastructure. SpotShops are customizable and can form fully automated walls or shop, both indoors and outdoors.

Beijing Unionpay Card Technology Co., Ltd.(Bank Card Test Center)

BCTC 银行卡检测中心 Bank Card Test Center

Based on EMVCo, PCI, GlobalPlatform, MasterCard, VISA, UnionPay, and some domestic specifications and standards, BCTC provides test / assessment services for chips, cards, acceptance devices, mobile devices, and payment-related systems, ensuring the products that have passed the test / assessment are interoperable and secure.
In addition to test / assessment services, BCTC also provide consulting and training services relevant to payment and bank card technologies.

BPC Banking Technologies (Asia Pacific) Pte ltd

bpc GROUP BANKING TECHNOLOGIES

SmartVista covers every aspect of electronic payments – high performance authorization switching and routing, full ATM and POS management, comprehensive card management, advanced fraud prevention, loyalty program management, card personalization and production, billing and merchant management and integrated internet and mobile banking.
SmartVista is created for all types of payment organizations requiring broad e-payment functionality.
More about SmartVista: http://bpcbt.com/products/smartvista/

Clientron Corp.

Clientron's all-in one POS terminal – Ares650, based on Intel® Celeron J1900 quad-core SoC Platform, is equipped with 15" touch display and supports 5-wire resistive touch or projected capacitive multi-touch. The front panel protection offers IP64 water & dust-proof and optional 6H degree scratch-proof with P-Cap touch screen. Ares650 presents the features of aluminum chassis, flexible installation and various peripheral options for easy expansion.

First in Asia Worldwide launch New Product Product Demo available at the event

Advanced Cards Systems Ltd.

ACR35 is one of the first mobile card readers that is capable of supporting both magnetic stripe cards and NFC tags for mobile devices. It is an ideal solution for mobile payment. It delivers NFC reader functionality and mobility, which allows you to use NFC and contactless applications on mobile platform. With this product, virtually anywhere is a point of sale.

Advantech Co. Singapore Pte Ltd

Advantech Ubiquitous Touch Computer (UTC) series provides an all-in-one industrial interactive touch terminal with various display sizes. UTC series comes with appealing aesthetic curve and ultra-slim design, and can easily integrate key peripherals such as RFID, MSR, 1D or 2D barcode scanner and webcam to replace standalone kiosk. Fanless design for higher durability, Gorilla Glass for higher scratch resistance, impact resistance, and remote management utilities to ease maintenance; are further industrial design considerations.

ARH Inc.

Kiosk Smart full-page passport reader is physical form factor optimized for e-gates and other CUSS projects. This latest device performs full spectrum authentication and data reading tasks, and it's also manufactured with consideration for intuitive customer experience.
ARH continues to offer various customizable OCR and authentication solutions, designs and manufactures OEM products, extends flexible software update and customer support options to meet any individual need.

Askey Computer Corp.

ASKEY

TN450A1 is an Android LTE enterprise Smartphone designed for today's Business Environment. TN450A1 is a full-function and stylish smartphone, supports LTE signal connection, Android JB OS, Qualcomm dual-core MSM8960, 4.5" wide viewing angle display, 2D Barcode Scanner, the ultimate enterprise smartphone

Cognitec Systems

FaceVACS-VideoScan detects and identifies persons of interest in real time while computing demographic and behavioral data, supporting security staff, marketing departments and operations management in one application. Anonymous facial analysis allows the software to compute people count, demographical information, and people flow in time and space, and to detect frequent visitors and crowds. The technology also compares faces to image databases and instantly finds known individuals.

Collinson Latitude

Spend, Earn and Redeem with Collinson Latitude

Collinson Latitude delivers a fully managed and supported end to end reward programme designed with card-issuing banks in mind. Requiring minimal integration and set up, Collinson Latitude enables you to encourage increased card usage and generate customer loyalty through differentiated products.

COMPRION

UT³ Platform is the core of our highly precise NFC Forum Analog Test Solution supporting conformance test cases for contactless interfaces. Its capabilities stretch from RF analog to digital and application level testing. UT3 Platform can emulate either the poller or the listener side or simply trace NFC data exchange. It also supports technologies like SWO/HCI, OMAPI and SEAC

ComWorth Solutions Pte Ltd

With KEOLABS products, we provide comprehensive testing solutions for contactless readers and cards as well as for NFC function in mobile devices. Our testing solutions include innovative protocol analyser, fully programmable reader / card emulator and complete test environments for compliance tests against various industry standards like ISO 14443, NFC Forum, and EMV.

Crossmatch

Crossmatch™ TM DigitalPersona Altus Solution
The Crossmatch DigitalPersona Altus solution provides a modular framework that delivers identity assurance through a strong multi-factor authentication client and server. Our Altus solution leverages fingerprint biometrics, smart cards, Bluetooth and other secure, yet affordable technologies. The solution enables service providers to create assured identities and subsequently authenticate employees, customers and citizens in real-time anywhere. Learn more at www.crossmatch.com

Direct Link APEC

We are introducing an Ecommerce distribution packet and parcel solution for cross border volumes ex Singapore, and ex Dongguan China. With no minimum requirements per destination, perfect solution for your cross border ecommerce packets and parcels to end receivers around the world. Welcome to come by our booth to learn more about this possibility.

Entrust Datacard

Launch Your ID Card Program - Quickly, Simply and Affordably
The Datacard® SD160™ card printer delivers the perfect mix of affordability, security and simplicity to get your ID card issuance program started. Featuring rewritable printing**, inline magnetic stripe encoding, a unique ultraviolet (UV) printing security feature and intuitive operation, the versatile SD160 card printer empowers you to meet a wide range of ID issuance applications requirements -- while protecting your bottom line.

Estel Technologies (P) LTD.

Estel's "Micro ATM" is an ultra low cost and portable ATM, which uses m-POS technology for an 'merchant assisted' ATM service, to enable cash withdrawals, deposits from customers' bank accounts via ATM cards, at authorized agent locations.

The technology enables banks to deploy a large number of these 'Human ATM's' at a fraction of the cost of traditional ATMs, and provide ATM services at the doorstep of their customers.

WebAFIS is INNOVATRICS' multimodal (fingerprints, face...) biometric identification solution. Its powerful and customizable identity management tools were designed to respond to articulated industry needs in order to solve different challenges:
1. Fraud Prevention
2. Biometric ID cards / Passports / Driving Licenses Issuance
3. Foolproof Border Control
4. Transparent Elections, Election Fraud Prevention
5. Secure Payments and Transactions
6. Secure Access
7. Time & Attendance

Institute for Infocomm Research

Institute for Infocomm Research
A*STAR

Institute for Infocomm Research has technological solutions, in the area of InfoComm, for companies. Its Ready-To-Go packages aim to assist companies in productivity gain. Some of the technologies showcased will include :
- Snap2Tell – a mobile application which uses image recognition to provide quick access to information
- Virtual Try-On – an interactive display that enables customers to try on digital clothings before purchase
- Restroom Visitlizer – a suite of sensors and system that enables companies to deploy janitors to restroom on-demand basis, improving productivity

Integrated Research

IR Prognosis solutions for payment hubs, unified communications ecosystems and contact centers are trusted by Fortune 500 companied to keep their businesses running. IR continues to be an industry pioneer with innovations in predictive analytics as well as advances in automation, allowing IT to stop a problem even before it happens

Kingdom Majorlink Kiosk Systems Limited

"FP550 is designed for enabling fast check-in and guest management applications in hospitality and travel locations. It features a flexible enclosure design that supports the option to add a wide array of identification components including but not limited to different types of readers, scanners, biometrics and mobile NFC. The request help function can be linked to the remote console installed at the reception desk or call centre. Besides guest check-in or check-out applications, FP550 is ideal for use to enable on-demand printing of nearby attraction guide, priority reservation of eatery as well as the orders of day tours and last minute travels."

MINT PAYMENTS™

Join the Payments Revolution in Asia

Mint is driving the payments revolution to many of the largest businesses in Australia, New Zealand and Europe. With a comprehensive platform to support your omni-channel payment needs, the Mint solution simplifies payment acceptance catering to all industries: mPOS, online, and in-store.

For banks, financial institutions, telcos, IT resellers or distributors

Mint Payments can help you market a mobile POS solution with minimal IT investment and maximum flexibility

Benefits:

- Secure PCI compliant payments platform with EMV level 1 and 2, Chip & PIN, and Contactless certified devices
- End-to-end solution including hardware, software, backend, merchant on-boarding, customer service, and acceptance of international and local cards
- Minimal IT investment required and fast integration in as little as 4 weeks

For corporates in retail, insurance, healthcare, food and beverage

Mint Payments can help you displace cash with mobile and online payments, streamline your reconciliation processes, and improve the customer experience

Benefits:

- Modular solution that improves the customer experience of your clients
- Seamless integration into any existing platform
- Cost savings and process efficiencies generated by displacing expensive cash and check payments

Customers Include:

KONICA MINOLTA BUSINESS SOLUTIONS ASIA PTE LTD

Konica Minolta is providing diners with an end-to-end single platform solution. Businesses in the food & beverage industry can publish information to consumers, leveraging on integrated core modules such as queue management, campaign management and data analytics. For a limited time only, our F&B Platform is available for a 3-month free trial.

Marson

Marson, a leading Auto-ID solution provider in Taiwan since 1990, launches Mobile NFC Reader and Mini Barcode Scanners featuring Pocket-sized, Long Battery Life, Vibration Indicator, Industrial-Class/Anti-Microbial Protection and Versatile Operation of both On-line and Off-line modes, with great compatibility for all major Android/iOS Smartphones and Tablet PCs in the market.

Mint Wireless Asia Pte Ltd

Mint Payments can help:
1. Banks and Telcos market an mPOS solution with minimal IT investment and integration in only 4 weeks of an end-to-end solution including hardware, software, backend, merchant on-boarding, customer service, and acceptance
2. Retailers, Insurances, Food and Beverage Distributors displace cash with mobile and online payments, improve customer experience, streamline reconciliation processes through a solution seamlessly integrated into any existing platform

Mitsubishi Paper Mills Limited

A rewritable thermal recording material "ThermoRewrite" can be printed and erased several hundred times by heat application. By using this technology, visual information can be renewed repeatedly. Therefore, the latest and most up-to-date information can be shown on the card. Moreover, combination with other technologies (e.g. RFID) can expand applications.

Mobile Credit Payment Pte Ltd

MCPayment offers a suite of payment products and solutions that harness reliability, security and efficiency. Our solutions include electronic & mobile commerce, B2B ecommerce, mobile Point-of-Sale and wireless Point-of-Sale. Our clientele includes etailers, retailers, f&b operators, hotels, government agencies, charities, loyalty cards services, telecommunications, travel agencies and more. We accept major credits cards such as VISA, Mastercard, Masterpass, American Express, JCB & China Union Pay.

NEXPERTS

NEXPERTS' award-winning NEXTWallet has been developed in conjunction with NEXTCloudPay to support cloud-based mobile payment through Host Card Emulation(HCE), enabling banks to provide a secure and simple-to-use mobile payment experience compliant with EMV ,Visa, MasterCard and American Express requirements. The interactive NEXTWallet interface enriches the mobile user experience by offering a suite of services such as payment, loyalty, coupons, and access control, in a single application, while allowing synchronization across all devices.

Numotics Motions Pte Ltd

Prism combines security camera video with software to build 'path maps' of people's movements (where they first go when entering a store) and 'heat maps' that use hot colors (like red and orange) to denote how long a customer has stood in front of an item, or how many times the item has been handled. (Prism says it uses privacy protection that 'removes' people from video before it's viewed.) Russell says video also allows companies to 'peek' into a store anytime, anywhere to see if the 'brand concept' (a store look) is being followed consistently.

Omnikx Technologies Pte Ltd

OMNIXK Key Safe Box is another innovative product developed to meet the modern office needs on key storage and control. Through simple setup, it allows User to draw keys and return keys at pre- assigned timeslot and eliminate the manual key issue process. It helps to free the Office administrator time allowing her to focus on other important work and improve overall office productivity.
